

For Developers

This page provides quick links to documentation for developers interacting with the Avalon Media System. If Avalon needs to be adapted for a specific instance, the following documents may be of use.

Various Documents:

- [ActiveEncode](#)
- [Avalon 6 Development Setup](#)
- [Avalon Ingest API](#)
- [Configuration Files](#)
 - [Bibliographic Import Configuration](#)
 - [Managing Controlled Vocabularies](#)
- [Exporting/Importing Fedora 3 Data for Testing](#)
- [Permalinks](#)
- [Player API](#)
- [Recipes](#)
 - [Reprocess an already ingested file](#)
 - [Using a single value for LTI course context_id, name, and label \(VOV-2993\)](#)
 - [Standing up two Avalon ecosystems on one host](#)
- [VirtualBox Networking](#)

Developer Documentation

- [Avalon on AWS](#)
- [Avalon Transcoding API](#)
- [Branching and Tagging Releases](#)
- [Bulk editing](#)
- [Change Control](#)
- [Chris's Notes](#)
- [Collection Member Role Help](#)
- [Communication \(IRC, Listservs, more\)](#)
- [Components](#)
- [Creating an End-User VM Image](#)
- [Current LTI Integration](#)
- [Dependency Graphs](#)
- [Discussion: Railsify the hydrant-engage gem?](#)
- [Embed Test Page](#)
- [End of Sprint Process](#)
- [Full installation through Puppet](#)
- [Functional Test Automation Options](#)
- [Getting Started](#)
- [Getting Started \(Linux\)](#)
- [Github repositories](#)
- [HOWTO: Make a flat branch for avalon-installer](#)
- [Hydra 7 + Blacklight 4 + Bootstrap 3 + Rails 4 Upgrade](#)
- [Interface configuration](#)
- [IU's Example Migration from Variations to Avalon 5.1.4+](#)
- [IU and NU Production Environments](#)
- [IU Avalon Release process](#)
- [Lancelot Embed Test Page](#)
- [Logging in via IU CAS](#)
