

# Minimum Sheet Music Requirements

Sheet music documents, such as those in the Hoagy collection, must meet these requirements before they are published on a live server:

- Manifestation object (if it exists)
  - Correctly implements the [Multi-copy Document Content Model](#)
  - RELS-EXT
    - contains relationship to parent collection
    - contains OAI identifier
  - DC (see requirements below for paged document)
  - MODS (see requirements below for paged document)
  - Correct PURL in all metadata records, including METS OBJID, default DC and PURL\_REDIRECT
- Paged document object
  - Correctly implements the [Paged Document Content Model](#)
  - RELS-EXT
    - contains relationship to parent collection (single-copy model) or parent manifestation (multi-copy model)
    - contains sequence number (multi-copy model only)
    - contains OAI identifier (single-copy model only)
  - MODS (at the manifestation level for multi-copy documents)
    - location contains PURL for "preview" thumbnail (usually first page), for "object in context", and for "raw object"
    - recordInfo/recordIdentifier contains the fullItemID
    - correctly handled by the SRU server (for PURL lookups)
  - DC (at the manifestation level for multi-copy documents)
  - Correct PURL in all metadata records, including METS OBJID, default DC and PURL\_REDIRECT
  - Contains METS structmap and filesec that references all pages at all resolutions
  - All metadata validates
- Each page object
  - Correctly implements the [Image Content Model](#)
  - RELS-EXT
    - contains relationship to parent document
    - contains sequence number
  - Contains MIX metadata for each image
  - Contains correct PURL in all metadata records, including METS OBJID, default DC and PURL\_REDIRECT
  - All metadata validates
- Statistics tracking system is in place
- Delivery system is in place
