

Minimum Image Requirements

Simple images, such as those in the Hohenberger collection, must meet these requirements before they are published on a live server:

- Correctly implements the [Image Content Model](#)
- RELS-EXT
 - contains relationship to parent collection (single-copy model) or parent manifestation (multi-copy model)
 - contains OAI identifier (single-copy model only)
- MODS metadata dissemination
 - Contains PURLs to detail page, large image, and thumbnail
- DC metadata (either stored or disseminated as a transformation of the MODS)
- MIX metadata for the master image if it's been digitized
- MIX metadata for each image size that's been created
- Some machine-readable indication that that item is public and complete
