

# XSLT Library

For Schematron examples, see <http://wiki.dlib.indiana.edu/confluence/x/71>

## MODS

- **IN Harmony:** Transforming metadata for the DeVincent sheet music collection (originally in an Access database) into IN Harmony MODS
  - Stylesheet: [devincent2INHmods.xml](#)
  - Sample DeVincent metadata: [devincentSample.xml](#)
- Mapping from TEI Header to MODS created by Rebecca Koesner at Emory
  - Stylesheet: [tei2mods.xml](#)
  - Template for converting text language to code form for <lang> element: [languageLookup.xml](#)

## EAD

- **General use:**
  - Add ID attribute to all c01-c12 nodes. Works for finding aids that comply to the Schema, not the DTD: [addIDs.xml](#)
- **Wylie Finding Aids:** Updating old EAD finding aids to comply with new ID scheme and to include links to digitized items
  - Stylesheet to add <dao> elements for every item: [addDao\\_wylie2777.xml](#)
  - Stylesheet to add sequential ID attributes to <c0x> nodes and some <dao> elements: [addIDs\\_wylie2777.xml](#)
  - Stylesheet to add linking <href> attributes to <dao> elements: [addHref\\_wylie2777.xml](#)
  - Finding aid before transformations: [InU-Ar-VAA2746\\_old.xml](#)
  - Finding aid after transformations: [InU-Ar-VAA2746.xml](#)

## TEI

- **Indiana Authors:**
  - Generating lists of unique values for encoded elements in the *Indiana Authors and their Books* encyclopedia. Encyclopedia files can be found at [euterpe/digitize/Indiana/Indiana Authors/TEI Encyclopedia](#). More stylesheets and lists here: <http://wiki.dlib.indiana.edu/confluence/x/kF>
    - Stylesheet to create list of countries: [createCountryList.xml](#)
    - Resulting country list: [countryList.xml](#)
    - Stylesheet to create summary of all elements: [createEncyclopediaSummary.xml](#)
    - Resulting summary: [encyclopediaSummary.xml](#)
  - Replacing incorrect IDs in Aptara-encoded IN Authors books (adapted from Wylie Finding Aids stylesheet)
    - Stylesheet to remove existing IDs and add new ones: [INAuthors\\_addIDs.xml](#)
    - Volume before transformation: [VAA2319.xml](#)
    - Volume after transformation: [VAA2319\\_new.xml](#)
    - Full workflow for correcting encoding: [Outsourced Encoding Guidelines](#)
- Mapping from TEI Header to MODS created by Rebecca Koesner at Emory
  - Stylesheet: [tei2mods.xml](#)
  - Template for converting text language to code form for <lang> element: [languageLookup.xml](#)
