

PHYDO Data Model

Based on the [Preservation Metadata meeting](#) and [9/8/2016 Meeting with Adam Wead](#), this is the current data model for IU:

Was determined that there is no need to model WGBH's LTO tapes as an Object or Work. Below is the data model for WGBH:

The model will be all File Sets, no Works and navigating to or searching for the shared LTO tape will be done using metadata, shown below:
