

Copyediting

1. [Add a Copyeditor](#)
2. [Copyedit Discussions](#)
3. [Upload Final Copyedit Draft](#)
4. [Send to Production](#)

1. Add a Copyeditor

The **Copyediting** tab includes three new boxes: "*Draft Files*", "*Copyediting Discussions*", and "*Copyedited*". "**Draft Files**" holds the rough copy of the submission that has recently been put through review. Before you are able to interact with the draft file, you will need to assign a copyeditor for this submission. Go to the "**Participants**" box on the right side of the page and select the blue "*Assign*" button in the top right corner.

The screenshot shows the Copyediting interface with the following components:

- Navigation Tabs:** Submission, Review, Copyediting (active), Production. A Help icon is in the top right.
- Notification:** Assign a copyeditor using the Assign link in the Participants list.
- Draft Files:** Includes a search bar, "Upload/Select Files" button, and a list of files. One file is shown: "31-1 Author, Article 3.pdf" with "Article Text" as the description.
- Copyediting Discussions:** Includes an "Add discussion" button and a table with columns: Name, From, Last Reply, Replies, Closed. The table is currently empty with "No Items" displayed.
- Copyedited:** Includes a search bar, "Upload/Select Files" button, and a list of files. The list is currently empty with "No Files" displayed.
- Participants Sidebar:** Features an "Assign" button, a "Journal editor" section with a dropdown menu showing "ojsadmin iuswadmin", and an "Author" section with a dropdown menu showing "Jane Smith".

You will be asked to locate a user with the copyeditor role from within the system. Make sure you choose the correct predefined message for the stage of copyediting and inform the potential copyeditor.

[ojs3wiki] Copyediting Request ▼

Message

B *I* U Upload

NAME :

I would ask that you undertake the copyediting of ""The Great Starlit Vault Of Heaven": Walt Whitman's Treatment of Death Through Astronomy" for OJS 3 Wiki Journal by following these steps.

1. Click on the Submission URL below.
2. Open any files available under Draft Files and do your copyediting, while adding any Copyediting Discussions as needed.
3. Save copvedited file(s). and upload to Copvedited panel.

OK

Cancel

Once your copyeditor has confirmed this request, you will need to wait for them to upload their copyedited version to the page, preferably by using the "Copyediting Discussions" box.

2. Copyedit Discussions

Most of the copyediting progress will be recorded with the "Copyediting Discussions" box. Here, copyeditors can upload various drafts and have authors and section editors approve of their work. To do so, click "Add Discussion" in the upper right corner of the "Copyediting Discussions" box. Under the "Participants" heading, select which individuals you want this particular discussion to be visible to - there may be some discussions you want to keep restricted to editors as well as some in which the author needs to receive updates. After writing your message, you can also choose these discussions as a place to store and send files that are not necessarily ready for placement in the "Copyedited" box. Discussions can be an excellent way to share revisions or rough drafts.

3. Final Copyedit Draft

Once the copyeditor has sent in a final copyedited draft, confirmed by both the journal/section editor as well as the author, you can upload the final draft into the central **"Copyedited"** box. Upload a file by clicking the *"Upload/Select Files"* link in the upper right corner of the box. Once the file is uploaded, you can double-check the file's information or change the file using the *"Edit"* button below the file name.

The screenshot shows a header bar with the title "Copyedited" on the left and "Q Search" and "Upload/Select Files" on the right. Below this is a file entry box containing a file icon, the ID "37-1", the filename "ojsadmin, Copyeditor, Article 3.pdf", and the text "Article Text". At the bottom of the box are two links: "More Information" and "Edit".

4. Send to Production

Your final page should resemble the image below, with a few discussions informing the section editor, author, and copyeditor at various stages and a final draft of the file available under **"Copyedited"**.

The screenshot displays a multi-tabbed interface with tabs for "Submission", "Review", "Copyediting", and "Production". The "Production" tab is active. On the left, there are three main sections:

- Draft Files:** Contains a file entry for "Author, Article 3.pdf" with ID "31-1" and "Article Text".
- Copyediting Discussions:** A table with columns: Name, From, Last Reply, Replies, and Closed.

Name	From	Last Reply	Replies	Closed
Copyedited file	ojsadmin Feb/13	ojsadmin Feb/14	1	<input type="checkbox"/>
Final copyedit complete	ojsadmin Feb/14	-	0	<input type="checkbox"/>
- Copyedited:** A file entry box for "ojsadmin, Copyeditor, Article 3.pdf" with ID "37-1" and "Article Text".

 On the right side, there is a "Send To Production" button and a "Participants" section with an "Assign" link. The participants are listed in three categories:

- Journal editor:** ojsadmin iuswadmin
- Copyeditor:** ojsadmin iuswadmin
- Author:** Jane Smith

The **Send to Production**, located to the right of the *"Draft Files"* box, begins by asking whether or not you would like to notify the author(s) that their submission has made it to the next stage of production. Once you have decided whether or not to contact the author(s), click *"Next: Send Files for Production"*.

Cancel

You will now be presented with two boxes that list potential files to upload to the production stage. The "Draft Files" box is included so that you can immediately move articles that don't require any copyediting straight to production after the review stage. If you went through any copyedits, your final draft should be uploaded underneath the "Copyedited" box. Be sure to check the correct file for upload, record the editorial decision, and officially move on to production.

Send To Production

Select the files you would like to forward to the Production stage.
