1. Submission Overview

Your Submission Dashboard will automatically link to the last completed tab of the submission process- in this case, for a recently submitted article, the first "**Submission**" tab. The last stage completed for each submission will be marked by a dark pink line on the top of the tab.

We will go over the "**Submission**", "**Review**", "**Copyediting**", and "**Production**" tabs in more detail as we walk through the editing process. On this page, we will look at the top blue menu bar that will be available throughout the submission and editing process.

The screenshot displays the Submission Dashboard interface. At the top, there is a blue navigation bar with tabs for "Metadata", "Editorial History", and "Submission Library". Below this, the article title "A Proposed Experiment to Test Spin-Dependent Effects Beyond Einstein's Theory of Gravitation: The Pound-Rebka Experiment with Spin" is shown, along with the authors "Jane Smith, T. Payne, J. Acosta, N. Schlossberger". A secondary navigation bar contains tabs for "Submission", "Review", "Copyediting", and "Production", with "Submission" being the active tab. A "Help" icon is located on the right. The main content area is divided into three sections: "Submission Files" with a search bar, "Upload File" button, and a list of files including "jsmith, Author, Article 1.pdf" (Article Text); "Pre-Review Discussions" with an "Add discussion" button and a table with columns for Name, From, Last Reply, Replies, and Closed; and a right-hand sidebar with a message "Assign an editor to enable the editorial decisions for this stage." and a "Participants" section with an "Assign" button and a list of authors including "Jane Smith".

2. Metadata

When you select "**Metadata**" on the top blue menu of the submission dashboard, you will be presented with the current metadata on file for that submission. Here, you can view or alter the section this submission is categorized under, the title, and the abstract.

Proposed Experiment to Test Spin-Dependent Effects Beyond Einstein's Theory of Gravitati

Subtitle

The optional subtitle will appear after a colon (:), following the main title.

Abstract *

B *I* U x^2 x_2 `<>` Upload

Einstein's geometric theory of gravity was constructed in part to explain why test particles in a gravitational field all follow the same trajectory independent of the mass of the particle. However, it is known that point particles in quantum mechanics must all possess at least two properties: mass and angular momentum. Many have speculated that spin-dependent effects in gravity might exist which are not contained in Einstein's theory, yet few experimental tests for such a possibility have ever been conducted. We describe an experiment which is very similar to the famous Pound-Rebka experiment, which used the Mössbauer effect to verify for the first time Einstein's prediction for the curvature of time, but which employs Mossbauer emitters and absorbers with nonzero spin. We present a specific, realistic proposal for such an experiment. We outline the the

You will see the current list of contributors below, and be given the option to add new contributors or change the primary contact for this submission if necessary. You can also add a cover image for this article. Finally, you will see the submitting author's responses to your required metadata fields. **Keywords and references should be present and also filled out completely**- if either of these two are missing or incomplete, you'll want to contact the author for that information. Any other metadata fields can be enabled or disabled in the [Submission Guidelines](#) section of your website.

3. DOIs

Under metadata, if you select the "Identifiers" tab within this metadata pop-up window, you can view or add a unique web identifier for this article's webpage on your public journal website.

The screenshot shows a modal window titled "Submission and Publication Metadata" with a blue header and a close button (X) in the top right. Below the header is a navigation bar with three tabs: "Submission", "Identifiers" (which is selected and highlighted with a blue underline), and "References". To the right of the tabs is a "Help" button with an information icon. The main content area contains a single text input field. Below the input field is the label "Public URL identifier". At the bottom of the window are two buttons: "Save" and "Cancel".

If you have DOIs enabled, you will also be able to see the DOI reserved (if not yet published) or minted (if published) for this article:

The screenshot shows the same modal window, but with the "References" tab selected. The navigation bar now includes "Submission", "Identifiers", and "References" (which is highlighted). The "Public URL identifier" input field is still present. Below it, the text "DOI" is displayed in bold, followed by the DOI number "10.14434/cfr.1990.vol12.2.26697". A paragraph of text reads: "What you see is a preview of the DOI. Select the checkbox and save the form to assign the DOI." Below this text is a checkbox that is checked, with the label "Assign the DOI to this article". The "Save" and "Cancel" buttons are at the bottom.

4. Editorial History

By selecting the "Editorial History" tab of the top blue menu, you can view the history and any notes about the submission.

5. Submission Library

The **Submission Library** can hold any files you may want your authors, reviewers, editors, or other users to consult. Every user within the system has access to this library during the submission process, and it can be used to store important documents and policies that don't fit easily into the various text boxes available throughout OJS. Feel free to use this feature as much or as little as you please.

The screenshot displays the 'Submission Library' interface. At the top, there is a blue header with the title 'Submission Library' on the left, a 'Help' button with an information icon in the center, and a close button (X) on the right. Below the header, there are two links: 'Add a file' and 'View Document Library'. The main content area is divided into four horizontal sections, each representing a category: 'Marketing', 'Permissions', 'Reports', and 'Other'. Each category section has a light gray header bar with the category name and a white body area containing the text 'No Items'.
