

Avalon Release Road Map

For detailed information on current and previous versions of Avalon, please see the [Releases page on Github](#).

Avalon 7.3 (Winter 2020)

- Improved support for Google Analytics and Matomo
- Transcript Display Support
 - Transcript documents able to be viewed alongside media content (closed captions support already present in the Avalon player)
 - Standard file types such DOCX and WebVTT supported for transcripts

Avalon on Hyrax (2021)

The next major version of Avalon will be written using the [Hyrax](#) Ruby on Rails Engine. The Avalon team's goal is to keep pace with current Hyrax development.

- Feature parity with Avalon 7.x
- Avalon IIIF Player will replace the current Avalon 7.x media player
- Uses a new audiovisual work type

Avalon IIIF Player

This React-based application will be under active development alongside Avalon 7.x and Avalon on Hyrax.
