

Playlist

Temporarily using [jwplayer playlist format](#), but we'll have to switch to using our own format soon.

    <jwplayer:duration>50</jwplayer:duration>
  </item>
</channel>
</rss>
```

This playlist could be used to create a mashup containing multiple videos played back to back seamlessly.

Here we can specify the start and end time of each video (only for RTMP streaming)

```
<jwplayer:start>20</jwplayer:start>
<jwplayer:duration>25</jwplayer:duration>
```

"duration" actually means "end" here
