

Zotero itemTypeFields

Zotero itemTypeFields

- These are the available fields for each itemType
 - This page only lists the 18 itemTypes likely to appear in Aquifer
 - This page omits the following itemTypes: attachment, blogPost, case, computerProgram, dictionaryEntry, email, encyclopediaArticle, forumPost, hearing, instantMessage, note, patent, podcast, radioBroadcast, statute, tvBroadcast, webpage
 - **creator** isn't listed here since it's in a separate table; it appears second: after title but before abstractNote

Core fields

- The following fields are in every itemType:
 - title
 - abstractNote
 - date
 - language
 - shortTitle
 - url
 - accessDate
 - callNumber
 - archiveLocation
 - repository
 - rights
 - extra
- The exception is the **presentation** itemType, which omits the following three fields:
 - callNumber
 - archiveLocation
 - repository

Additional fields

- Legend for cell values
 - + = this field exists in this itemType
 - text = the field with this name exists; it corresponds to the baseField in the first column
 - [blank] = this field does not currently exist for this itemType
