

Services

Hardware and Workflow Assistance

Born Digital Preservation Lab. Contact the Born Digital Preservation Lab (BDPL) for access to obsolete digital media and corresponding hardware, as well as to established workflows for preservation and access to obsolete files and formats. The BDPL is mainly available for collection managers within the IU Libraries, but can provide guidance to outside content owners.

Storage Practices@IU. This page provides guidance to collections and campuses using the Scholarly Data Archive (SDA) as their main storage solution. Here you will find suggested workflows for depositing and retrieving content, along with practical steps for preservation practices like fixity checking.
