5.0

Initial release of Variations3 server and client. This release represents a large number of changes to the Variations2 software in order to facilitate configuration and installation at Variations3 test sites.

5.0.1

This release includes a number of small bug fixes and includes some cataloged IU Jacob's School of Music content for general usage and testing purposes by test sites. See [Variations3 Release 5.0.1](#) for a full list of changes.

5.0.2

This release includes improved score support, improved import tracks functionality, PAM authentication support, sticky file choosers, the ability to send playlist tracks to other playlists, and a few bug fixes. See [Variations3 Release 5.0.2](#) for a full list of changes.

5.0.3

This release includes many bug fixes and the ability to install the Variations server in an arbitrary directory. See [Variations3 Release 5.0.3](#) for a full list of changes.

5.0.3.1 (Mac Client Only)

This release includes two small bug fixes dealing with JavaApplicationStub. See [Variations3 Release 5.0.3.1](#) for a full list of changes.

5.0.4

This release includes many bug fixes. See [Variations3 Release 5.0.4](#) for a full list of changes.

5.0.5

This release includes changes to support Variations-Web and many bug fixes. See [Variations3 Release 5.0.5](#) for a full list of changes.

5.0.6

This release is the first open source release and includes changes to support DRAM as well having bug fixes. See [Variations3 Release 5.0.6](#) for a full list of changes.

5.0.7

This release includes changes to support DRAM as well having bug fixes. See [Variations3 Release 5.0.7](#) for a full list of changes.

6.0

See [Variations Release 6.0](#) for a full list of changes.

6.1

See [Variations Release 6.1](#) for a full list of changes.

6.2

See [Variations Release 6.2](#) for a full list of changes.

6.3

See [Variations Release 6.3](#) for a full list of changes.
