Installing and Configuring the Variations Webapps - 6.*

ⓘ This page is a work in progress. Please use Installing and Configuring the Variations Webapps - 6.0 instead.

Installing and Configuring the Variations Webapps - 6.*

⚠ **Note**

These instructions assume that the Variations webapps will be installed on the same system as the Variations server is installed on.

Contents

Apache and Tomcat Installation and Configuration

See Readying a Variations server for Variations-Web for instructions on how to install and configure Apache and Tomcat for the Variations Web Applications.

Variations Web Services

See Installing and Configuring the Variations Web Services - 6.*.

Variations Web User Interface (Web Player)

See Installing and Configuring the Variations Web User Interface - 6.*.

Variations Access Manager

See Installing and Configuring the Variations Access Manager - 6.*.
