

Access

This page is relatively straightforward, as it allows the journal manager to enable one of three options for access to the journal's content. Currently, IUScholarWorks is only supporting open access journals, so the first option should be enabled. The third option might be used in case the journal needs to temporarily take down its web presence, but the second option should not be enabled at any point.

Access to Journal Content

OJS provides a number of security-related options that can be used to restrict the journal's contents, and maintain additional information about submissions for auditing purposes.

- The journal will provide open access to its contents.
- The journal will require subscriptions to access some or all of its contents.
- OJS will not be used to publish the journal's contents online.
