Date	Submitter	Workflow Name	Workflow Step	Output File	Final
No results					

The Deliverables page allows users to toggle whether or not a given output is placed in an export bag to be delivered to another system. Presently, the only feature is toggling individual completed workflow steps to be delivered. As at this point in the pilot stage, AMP does not have any system to deliver metadata to, this feature does not have much functionality. However, it will play a very important role in the final product
