

For Collection Managers

This page provides quick links to documentation for content and collection management within the Avalon Media System. Information pertaining to uploading content, creating collections, editing existing items, providing access, etc., can be found within these documents. If you are new to using Avalon for collection management, you should begin with the [Avalon Collections Guide](#).

Collection Management:

- [Avalon Collections Guide](#)
- [Collection Member Roles](#)
- [Setting Item Access Control](#)
- [Setting the Thumbnail Image for a Video Item](#)
- [Avalon Derivatives](#)
- [Supported Source Formats and Codecs](#)
- [Managing Collections Efficiently](#)
- [Delivering Avalon Content Through a Learning Management System \(LMS\)](#)
- [Adding Structure to Files Using the Graphical XML Editor](#)
- [Using Archivematica with Avalon](#)

Batch Ingest:

- [Uploading Content using Batch Ingest](#)
- [Troubleshooting a Batch Ingest](#)
- [Install Sample Content Via Batch Ingest](#)
- [Batch Ingest Package Format](#)
- [Generating Ingest Spreadsheets from Variations XML Files](#)

Uploading Content:

- [Uploading Content to an Avalon Dropbox](#)
- [Uploading Content using Batch Ingest](#)

Migration from Variations to the Avalon Media System:

- [Exporting Variations Bookmarks to Avalon](#)
- [Generating Ingest Spreadsheets from Variations XML Files](#)
