

Connecting to Google Drive

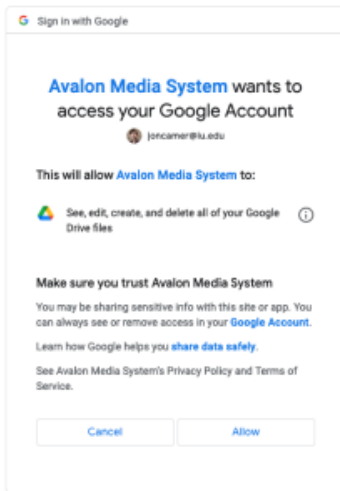

When Google Drive is configured, it will display as a *Source* option in the "Open Dropbox" dialog. After following the prompts and authenticating with Google, your Drive files can be navigated and selected as an upload source.

Upload Files Via Google Drive

- Click the "Open Dropbox" button
- A window will open that prompts the user to authenticate with Google for Drive access:

- Click the "Connect to Google Drive" button
- An access consent screen will display:

- The details in this screen will be specific to what your Avalon site and what administrators have configured with Google
- Click "Allow", and Google Drive folders will display in the file picker dialog:

Source:

Warning! Uploading too many files at once can lead to ingest failures.

Name	Select All?	Size	Kind	Modified
▶  My Drive	<input type="checkbox"/>	0 bytes	drive	2022-03-18 14:41
▶  Shared drives My Drive	<input type="checkbox"/>	0 bytes	drive	2022-03-18 14:41

0 files selected

- Select a file from the listing and click "Submit" to be uploading the media file
